

Extend your reach.

With Qrelay, you can be assured that your control is complete, even in areas or sites where reception may not be the best. Just add Qrelay to ensure that a signal reaches your QMotion® shades, wherever they are located:

- Use as many as you need; Unique design code technology ensures no cross interference between devices.
- Two modes of operation to suit your preferences.
 - Zone specific mode allows two different remotes to be learned to the Qrelay.
 - Echo mode repeats all valid QMotion® remote commands.
- Plug in wherever you have a 110V outlet, or into a properly powered USB port.

Qrelay extends the capability of QMotion® shades by assisting signal transmission and reception when needed and is compatible with all QMotion® transmitters.

Qrelay is easy to use. Just plug into a standard wall outlet.
